Integrated Housing Services and Monitoring System for Local Government Human Settlements by Bivoso, Coronel, Tabuada BSIS 3C

1. Write your Week 3 Task based from your established GANTT CHART.

TASK SCHEDULE FOR WEEK 3- GANTT CHART

Bivoso, Meryl B.
Coronel, John Tyrone P.
Tabuada, Dhenby Grace C.

1. Week 3 Task Schedule

During the Week 3, the team focused on activities under the planning phase and system design phase of Integrated Housing Services and Monitoring System for Local Government Human Settlements. These activities included conducting initial interviews and data gathering, consolidating and validating requirements, and starting the design of the system through database design and UI/UX wireframes for all modules.

At this stage, the team was able to begin the interview process with the beneficiary and gather initial information needed for the study. However, additional interviews are still needed, so the data gathering activity remains in progress. Also, the database design and UI/UX wireframes are still being developed and have not yet been fully completed as we need to finalized first our features of our system. But, for compliance, we have started it and in progress.

These Week 3 tasks are important in building a clear foundation for the system by identifying user requirements, organizing database structure and preparing the interface of the modules. The Outputs for the Week 3 include initial interview responses and data gathering notes, draft of validated requirements, ongoing beneficiary interview process, initial or partial UI/UX wireframes for all modules included, initial or partial design of our Database design or ERD draft and updated Gantt chart showing the current progress of our tasks.

2. Upload your evidence that support your Task Week 3.

Evidence during Data Gathering.

3.1 System Architecture Overview

The Integrated Housing Services and Monitoring System (IHSMS) is designed as a centralized web-based information system that supports the operational processes of the Talisay City Housing Authority. The system integrates key housing governance functions such as Informal Settler Family monitoring, housing application management, document tracking, housing project and unit monitoring, case management and operational reporting.

The system is developed to address the fragmented and manual processes previously used by the Housing Authority in managing housing-related records. By consolidating these processes into a single digital platform, the system enables authorized personnel to record, track and monitor housing data more efficiently.

To support organized system processing, the platform follows a three-tier client-server architecture consisting of the Presentation Layer, Application Layer and Data Layer. These layers work together to allow authorized staff to interact with the system through web interfaces while application logic manages requests and stores data in a centralized database.

CONSOLIDATED SYSTEM REQUIREMENTS

2. Identified Users of the System (NOT SURE)

Based on the office structure, the system will involve the following users:

Administrative Staff

Responsible for:

- encoding ISF records
- recording housing applications
- tracking submitted documents
- recording cases or concerns

Housing Officers / Technical Staff

Responsible for:

- evaluating housing applications
- verifying submitted documents
- monitoring housing projects and unit availability

4. Upload the updated status of your Task - GANTT CHART.

INTEGRATED HOUSING SERVICES AND MONITORING SYSTEM FOR LOCAL GOVERNMENT HUMAN SETTLEMENTS																		
GANTT CHART																		
Task ID	Task Name	Lead	Start Date	End Date	Duration (days)	Feb	Mar				Apr				May			
						W4	W1	W2	W3	W4	W1	W2	W3	W4	W1	W2	W3	W4

5. As one of your evidence for data gathering, upload here the open-ended, closed-ended, and probing questions you raised during interview in relation to you Objective Statement in your Capstone.

INTERVIEW QUESTIONS FOR DATA GATHERING

The following questions were prepared as part of our initial interviews with the Talisay City Housing Authority Office.

Open-Ended Questions :

1. Can you walk us through the complete process when an Informal Settler Family applies for housing assistance, from the moment nga hag approach and natakag list until they are assigned a housing unit?
2. Which staff members are involved in handling housing applications, and what are their responsibilities in the process?
3. What information or reports are most important for the Housing Authority to monitor regularly?
4. How does the office currently monitor housing projects and assign available housing units to approved beneficiaries?
5. What are the most common problems or difficulties you experience in the current housing application and monitoring process?

6. For clarification, is your office mainly focused on ISF applicants?

Close-Ended Questions:

1. How many staff members are there in the office?
2. How many staff usually handles ISF applicants?
3. How many housing projects do you currently have?
4. In what location, ang mga housing projects located?
5. How many housing units are available in each project?
6. How many beneficiaries are usually given to beneficiaries?
7. How many batches have already given?
8. What information or mga documents are required from applicants before they can be approved for housing?
9. Do you verify whether the applicant is truly qualified as ISF?

Probing Questions :

1. What are the specific roles of each staff?
2. What is the organizational structure of the office?
3. How do you identify if the applicant is an Informal Settler?
4. Can you explain the step-by-step procedure when applying?
5. If many applicants apply but only few housing units are available, how do you determine who will be prioritized?
6. Can you explain again the exact step-by-step process?
7. What part of the current process do you find most challenging?
